

Carbon footprint information

For Trioplast AB product Trioloop hand film.
75% Recycled content where of minimum 51% PCR.

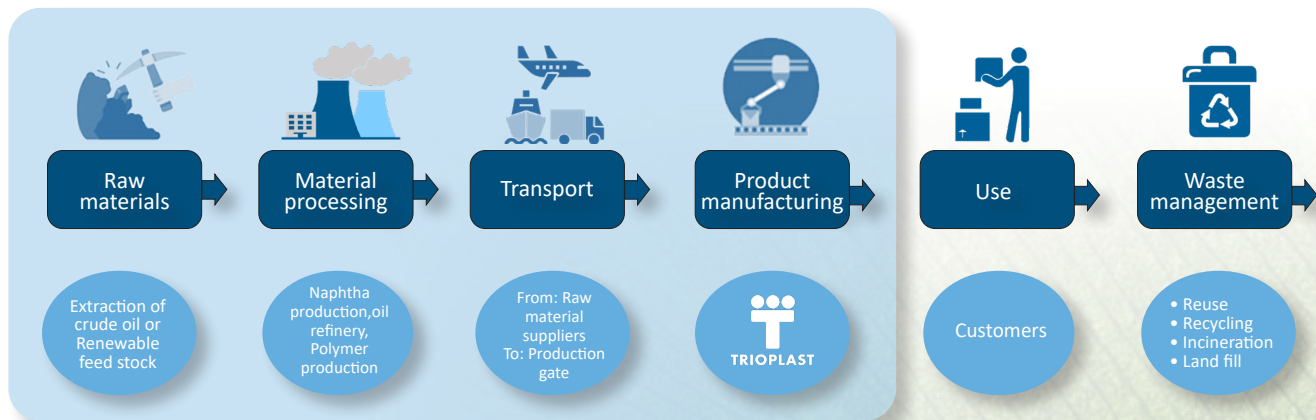

Item number: 9237

The carbon footprint value given in this document is calculated based on Life Cycle Assessment (LCA) with associated assumptions using **SimaPro®** software.

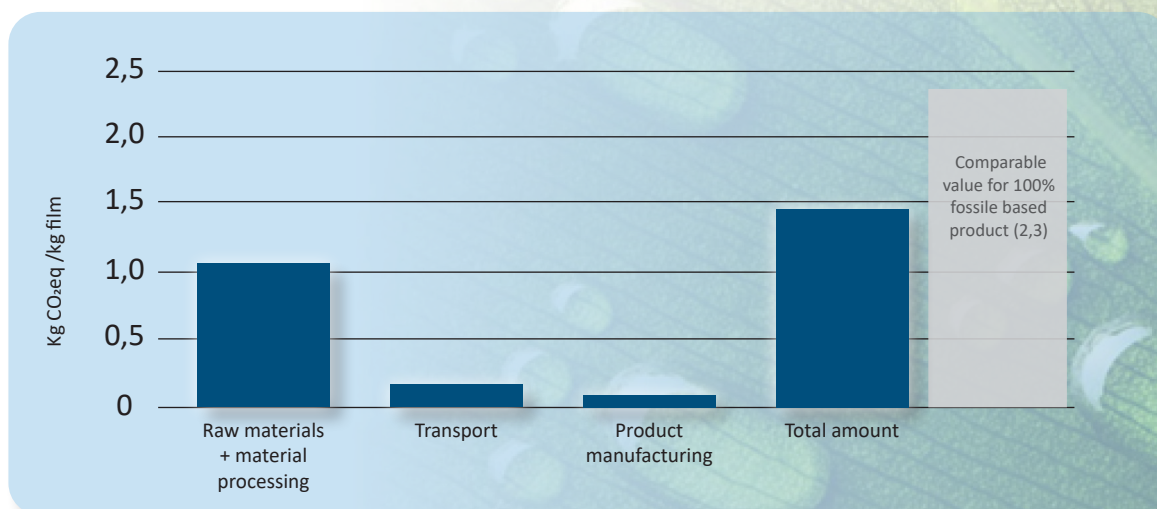

Total carbon footprint: 1,5 kg CO₂ eq. /kg film

System boundary:

The steps Raw materials, Material processing, Transport and Product Manufacturing into the final product at Trioplast AB are included in the assessment, see figure below.

Carbon footprint divided into different steps:

Name: Kim Andersson
 Title: Material development engineer
 Department: Material Development
